

**Time limit:** 15 minutes.

**Instructions:** This tiebreaker contains 3 short answer questions. All answers must be expressed in simplest form unless specified otherwise. You will submit answers to the problem as you solve them, and may solve problems in any order. You will not be informed whether your answer is correct until the end of the tiebreaker. You may submit multiple times for any of the problems, but **only the last submission for a given problem will be graded**. The participant who correctly answers the most problems wins the tiebreaker, with ties broken by the time of the last correct submission.

**No calculators.**

1. Kevin is running 1000 meters. He wants to have an average speed of 10 meters a second. He runs the first 100 meters at a speed of 4 meters a second. Compute how quickly, in meters per second, he must run the last 900 meters to attain his desired average speed of 10 meters a second.
2. Let  $a$  and  $b$  be the roots of the quadratic  $x^2 - 7x + c$ . Given that  $a^2 + b^2 = 17$ , compute  $c$ .
3. Compute

$$\sin\left(\frac{\pi}{9}\right) \sin\left(\frac{2\pi}{9}\right) \sin\left(\frac{4\pi}{9}\right).$$
